

UK ART CLUB  
DISPLAYS WORKSExhibit Downtown  
Shows Variety

The University of Kentucky Art Club, an organization recognized by the U. K. senate, is sponsor of an exhibition of paintings, prints and drawings which opened Monday at Gribbin's studios, High and Limestone streets.

This is the first showing of this kind which has taken place in downtown Lexington. The exhibitors include members of the club, graduates of the University art department and local painters. These young artists have had pieces exhibited in the important art centers of the country—New York, Chicago, Cincinnati and other cities.

On display from 10 a. m. to 4 p. m. every day this week is a varied collection of landscapes, portrait and life sketches, still-lives and a number of works taken from the ever-popular subject-matter known as the "American Scene." Individual articles show a wide range in handling and technique. Unlike the usual show of a single "school," complete freedom is allowed the exhibitor in his manner of working.

Oil technique includes the bold handling of the palette knife to the most meticulous type of fine brush work. Style ranges from unbroken traditional realism to the highly designed abstract forms of contemporary art. Paintings in oils and water-color, lithograph and block prints, pastel, chalk, pencil and pen-and-ink drawings show the medium versatility of Bluegrass artists.

Young women of the club will act in the capacity of hostesses to welcome guests to the exhibition. The public is invited to see the showing, at which no charge will be made.

—CLAY LANCASTER.

News Briefs  
From Here  
And TherePotter Sees Need  
For 'Toughening'

Dr. M. E. Potter, head of the physical-education department of the University of Kentucky, was guest speaker yesterday at the Lions' club weekly luncheon meeting at the Lafayette hotel.

"Physical Fitness in Terms of National Defense" was the subject of Dr. Potter's talk, in which he emphasized the necessity for "toughening up" American citizens to develop the physical and moral strength needed to make the United States leader of the world.

Alcorn To Direct  
Hospital Service

Edward B. Alcorn, a graduate of the University of Kentucky, has been selected as enrollment secretary of the Community Hospital Service. It was announced yesterday.

A graduate of the 1937 class of the College of Commerce of the University, Mr. Alcorn has worked in Lexington since his graduation. He is a native of Hustonville, Ky., and is a member of the Sigma Chi fraternity.

The Blue Cross Plan of the hospital service, which gives employee groups hospitalization protection at low monthly membership rates has enrolled more than 1,500 persons since it was formed by St. Joseph's and Good Samaritan hospitals June 1.

Headquarters for the Blue Cross are located in room 306 of the Herndon building.

Baker Appointed  
At Northwestern

Dr. Robert H. Baker, assistant professor of chemistry at the University, has resigned that post effective Sept. 7 to take an assistant professorship in organic chemistry at Northwestern University of Evanston, Ill. It was announced today.

Dr. Baker is teaching a defense course in materials inspection and testing in the University summer school and will leave early in September for his new post. His wife and two sons will accompany him.

Dr. Baker received his bachelor of science and master of science degrees from the University of Kentucky and his doctor of philosophy degree from the University of Wisconsin. He has been teaching at the University since 1931.

## ELECTRON MICROSCOPE

DENTON, Tex.—An electron microscope which will magnify an object 100,000 times its original size and show, in a few instances, the actual molecules of a compound, was discussed in the "America Today" course at the North Texas State Teachers College recently by Dr. Joseph Morgan, summer visiting faculty member on the physics staff.

FLYING CADETS . . . MAN YOUR PLANES

And fledgling pilots, including eight from the University of Kentucky, move their basic training planes for another morning aloft in Texas skies — one step nearer completion of America's program of training 30,000 pilots a year.

Eight Former Students Win  
Degrees At Randolph Field

A degree from the "West Point of the Air" was added to the academic backgrounds of eight former University of Kentucky students on July 12 as they successfully completed their basic flying training at Randolph Field, Texas. They are:

Thomas H. Cline, Augusta, Ky., '38-'40;

Dennis Crisp, Lexington, Ky., '37-'39;

Edgar H. Dunn, Jr., St. Petersburg, Fla., '39-'41;

Richard V. Fanelli, Anchorage, Ky., '40, B.S.;

Landon C. Hendricks, Mewan, W. Va., '39-'40;

William D. Leet, Lexington, Ky., '34-'37;

Edwin A. Proctor, Owenton, Ky., '38-'40;

Donald J. Stone, Spencer, W. Va., '38-'40.

This class of pilots-to-be entered the enormous south Texas basic training school on May 2 after having completed 10 weeks of primary training. At primary schools they logged some 65 hours of flying time in 200-horsepower planes and gained the experience necessary to handle the 450-horsepower basic trainers at Randolph.

Having their basic training these embryo pilots go now to advanced schools where they will specialize in either single- or multi-motored equipment preparatory to taking their place with the newly-created Air Force Combat Command. And in September these youngsters will win their wings and be commissioned as second lieutenants in the Air Corps Reserve.

Every five weeks finds new classes of American youths between the ages of 20 and 26 entering the 30-week course, destined to become military pilots. Former students and graduates of colleges and universities are finding in the Flying Cadets an opportunity to capitalize on their specializations in our rapidly expanding air force.

Flying Cadet training has become even more attractive to high school graduates and college men with recent changes in the allowances and qualifications. In addition to \$75 a month, plus uniforms and equipment, food, quarters, and medical and dental care Flying Cadets now receive a \$10,000 life insurance policy in effect during training, and upon graduation receive a uniform allowance of \$150.

Under new regulations former college students who have not completed the required two years of college may, however, be exempted in the mental examination from subjects which they have completed in college.

As a second lieutenant on active duty with the Army Air Corps, the young officer receives \$205 a month, plus quarters, or \$245 a month.

Palmer, a regular guard on Ab Kirwan's grid team, will serve as an assistant to Charles (Hammerhead) McClurg, another former U. K. star who now is chief at Harlan, and also will assist with the junior high basketball team. He will teach history classes at the high school.

A native of Mt. Sterling where he played two years as fullback on the high school team, Palmer will be graduated from the University in August. He and Mrs. Palmer will move to Harlan before Sept. 1.

Drawings On Tour

An exhibition of original Walt Disney drawings now is touring the country under the auspices of the Los Angeles Museum of Art. Many "Fantasia" pictures are included in the collection.

Steinfort Named

Roy Steinfort, former sports editor of The Kernel, has been appointed athletic publicity director of the University, Bernie Shively, athletic director announced yesterday. He will replace Fred Hill, who has been called to active duty in the United States Army.

Palmer Accepts Coaching Job

Robert Palmer, one of the stalwarts on the University of Kentucky football team for the last three years, has accepted a position as line coach at Harlan high school and will assume his duties there next fall.

Mrs. Smith Attends Altruas Meeting

ROANOKE, Va.—Mrs. George Edwin Smith, of Lexington, Ky., a member of the English faculty of the University of Kentucky and district governor of Altruas International, presented candidates for international officers of the women executives' convention at a formal dinner here Wednesday night.

Johnson Praises UK For Services To Kentucky

University students, faculty, and friends to the number of 450 turned out last Wednesday to give an enthusiastic welcome to the University's three new administrative heads—President Herman Lee Donovan, Comptroller Frank Peterson, and Dean Henry H. Hill—and their wives.

The Union ballroom was jammed with guests who heard the new and retiring University administrators welcomed and praised by several speakers.

Principal speaker on the roster of those who gave brief welcomes to the new leaders was Gov. Keen Johnson who stated that he was "certain that in the selection of these men the right answer to the problem of administrative leadership of the University has been found."

In briefly touching upon the future possibilities of the state University, the governor emphasized the desirability for the commonwealth to use the University of Kentucky's graduates more and more in affairs of state where "they have recently proved so competent" and to take advantage of the research facilities of the University in every possible manner in which they could better the state. As an example of this use, he pointed to the new highway research laboratory which now is being used to study road materials for Kentucky highways.

ADAMS IS TOASTMASTER

Dr. Jesse E. Adams, director of the summer session, acted as toastmaster for the occasion.

For the retiring administration, Dr. Thomas Poe Cooper, dean of the College of Agriculture and acting president of the University from July 1, 1940, to July 1, 1941, expressed his confidence in the men who were just adjusting themselves to their new duties.

Ray Rinford, superintendent of schools in Versailles and student in the summer school, then spoke on behalf of the student body and wished Dr. Donovan and his colleagues a long and successful stay in office.

For the faculty, Dr. Thomas D. Clark, associate professor of history, assured Dr. Donovan that he had the support of the faculty for

the building program he outlined in his convocation address last Friday and expressed the faculty's conviction that its new leaders had the vision necessary to lead the University into new services for the state.

LEE McLAIN HEARD

On behalf of the alumni association, Lee McLain, executive secretary and Dr. E. Cronley Elliott, president, both made short welcome speeches. They expressed the association's gratitude to the trustees of the University for their choice in administrative heads and assured them of the association's hearty co-operation in guiding the University's affairs.

Harper Gatton, superintendent of Madisonville schools and a member of the Board of Trustees of the University, urged faculty and alumni support for Dr. Donovan's building program and for his campaign to secure additional funds from the state government for building and maintenance at the University.

In his response to the welcomes of the previous speakers, Dr. Donovan pledged himself and his colleagues to do their utmost to make their contribution to the University as Dr. Frank L. McVey, president emeritus, and others had before them. He declared that he did not believe the University could become a greater institution than it now is without additional resources from the state, but assured faculty and alumni alike that, important as he considered the physical attributes of a state university, he believed that "the function of teaching is the great function of a university, for without the teacher no university can succeed."

HILL, PETERSON HEARD

Dr. Hill and Mr. Peterson joined Dr. Donovan in expressing their enthusiasm for the tasks ahead of them, and pledged themselves to give the best of their services in their new offices.

In concluding the ceremonies, Dr. Adams presented the wives of the three new administrators and the other ladies seated at the speakers' table. He then called upon Dr. McVey who, after welcoming the guests of honor, expressed the hope that they could stand up under the strain of "outing their way in the University faculty" which custom, he assured them, was cordially meant as it was time-honored.

And so, when friends Kinsades, Drakes and the rest came back from a hard day's chasing the Spartans, seeking a little amorous diversion, the wives just wag their fingers and say "Oh no you don't."

That's how all the trouble starts. CLASSIC MODERNIZED

A modernized plain-clothes version of Aristophanes' famous comedy, Guignol's "Lysistrata" is a good demonstration that the classic writers knew good fun when they

ize on their specializations in our rapidly expanding air force.

Palmer, a regular guard on Ab Kirwan's grid team, will serve as an assistant to Charles (Hammerhead) McClurg, another former U. K. star who now is chief at Harlan, and also will assist with the junior high basketball team. He will teach history classes at the high school.

A native of Mt. Sterling where he played two years as fullback on the high school team, Palmer will be graduated from the University in August. He and Mrs. Palmer will move to Harlan before Sept. 1.

TWO HONORARIES  
NAME INITIATES  
DURING WEEKPhi Delta Kappa,  
Kappa Delta Pi  
List New Members

Phi Delta Kappa and Kappa Delta Pi, campus honorary education societies, held initiation exercises for new members during the past week.

Phi Delta Kappa held its induction Thursday afternoon in the University school library. Initiates were: H. P. Adams, assistant principal Lafayette High School, Lexington; Ira C. Ball, teacher, Putnam County Schools, Winfield, West Virginia; Max Everett Calhoun, assistant principal, Hitching High School, Hitchings; Norman H. Cameron, teacher of business education, Ayden, North Carolina;

Charles Crum, teacher, Kenton County Schools, Covington; Russell G. Gundiff, assistant principal Lynnvale Consolidated School, White Mills; De Verne H. Dallage, teacher, Shawnee High School, Charleston, West Virginia; Solon Gentry, supervisor of practice teaching in business education, Winthrop College, Rock Hill, South Carolina; J. Noel Glascock, assistant principal Owensboro Elementary School, Owensboro; Walter Hayes Greenwood, teacher, Fort Smith High School, Fort Smith, Arkansas;

George Henry Hale, principal, New Columbus Consolidated School, Corinth; Robert W. Hamilton, superintendent, Greenup City Schools, Greenup; Raymond Dudley Johnson, instructor in commerce, Sparta, Tennessee; John W. Koon, principal, Warsaw High School, Warsaw; John B. Morland, teacher, Hobart High School, Hobart, Indiana; and Everett Stollings, principal, Elletts Junior High School, Stollings, West Virginia.

Following the initiation the new members were guests of the chapter at a fish fry held at Castlewood park.

Yesterday afternoon, Kappa Delta Pi conducted its initiation of new members at Camp Cliff Echoes, on the Kentucky river at Clifton. The initiates were Mary Maxwell Woods, Lillian Cozart, Juanita Shumaker, Dorothy Bennett, Pauline Gibson, Hazel Embury, Ruby Lee Hyslop, Ruby M. Proctor, Genevieve Parrie, De Verne Dallage, Martha Rae Eversole, and Ruth Everett. A picnic was held after the initiation.

Over 300 Courses Offered  
For Second Summer Term

More than 300 courses from approximately 100 faculty members will be offered during the second semester of the summer session, beginning July 21, Dr. Jesse E. Adams, director, announced yesterday.

In addition to classes in all colleges and most departments, the second term will include as highlights the annual coaching school from August 11 to August 16. Short courses in agriculture and education during both two and one-half week periods; and a botany field trip to Cumberland falls.

Dr. Adams told The Kernel yesterday that prospects for the term enrollment are very satisfactory. He pointed out that in addition to the large number of persons now on the campus who will continue through the second term, many new students have signified their intention of enrolling.

Social and recreational programs similar to those scheduled this semester are being planned for next term. The social committee in charge of dances, teas, open houses and like affairs is composed of Mrs. Sarah B. Holmes, chairman, Miss Rebecca Van Meter, Miss Margaret Lester, Miss Alberta Limbach, Miss Chloe Gifford, Mrs. Margaret King Koons, Professors R. D. McIntyre, Alexander Capurso, Thomas Hankins, L. J. Horlacher, O. T. Koppus, Morris Scherago, Jesse E. Adams, Bart Peak and M. G. Karsner.

Among highlights of the semesters curriculum will be these:

Annual UK coaching school, August 11 to 16, with Frank Leahy, Notre Dame football coach, leading advanced football classes, and

Paducah Star To Attend UK

PADUCAH, Ky.—Jesse Tunstall has made up his mind.

The three-time all-State, two-time all-Southern Tighman High School quarterback announced Saturday night he would enroll in the University of Kentucky September 1.

Tunstall, who led all major high school players in the nation in scoring last fall with 189 points in nine games, has favored Kentucky all along but he withheld his announcement so as not to make a snap decision he might later regret.

"I hope I will be able to do as much for the University of Kentucky," he said, "as I feel it will do for me."

Former Student Enters Air Corps

Flying will not be new to Perry C. Bronaugh, son of Mr. and Mrs. Graham Bronaugh, R. R. 1, Paris, who has passed preliminary examinations toward an army aviation cadet scholarship. It was disclosed today at Fifth Corps area head quarters at Fort Hayes, Columbus, Ohio.

Bronaugh has 47 air hours to his credit and has a private pilot's license. He graduated from Pleadome high school at Lexington, attended Transylvania College and the University of Kentucky, majoring in commerce.

Even the original lack.

Clarence Geiger, for his combination of several scripts and able direction, deserves a major share of the credit for the success of the production.

A ballet by Gloria Stevens, directed by William Carter Starr, is a feature of one of the acts.

Sets, designed by Clay Lancaster, were executed by members of the class in dramatic production, who also serve as property manager and wardrobe mistress.

The play will be presented Tuesday, Wednesday and Thursday nights beginning at 8:30. The play is relatively short, about an hour and fifteen minutes in length—and will not take too much time away from summer session studies.

Reserved seats may be ordered at the box office.

The cast is composed exclusively of summer school students with the exception of Blaine W. Schick, professor of romance languages.

The production is said to be the first full-length Guignol presentation to be offered in several years.

MOODS VARIED

Altogether, the play provides a good variety of moods. It alternates twinkling humor with raucous slapstick and takes full advantage of the many possibilities of its theme.

The major portion of Aristophanes' plot is there, with additional situations thrown in, and an epilogue added which gives a punch that

Theater To Be  
Air-Conditioned  
For Performances

Guignol theater's first full-length summer production since 1933, a modernized version of "Lysistrata," classic Greek comedy by Aristophanes, opens tonight for a three day run.

Performances of the play, directed by Clarence Geiger, will be given tonight, Wednesday night, and Thursday night beginning at 8:30.

An air-conditioning system, installed especially for the performances, is expected to make the little theater on Euclid avenue more comfortable, Geiger announced yesterday.

The Guignol version of the Greek classic makes use of modern dress and stage technique and eliminates the choral background. Various characters are assigned the dialogue used by the chorus, Geiger explained.

## CAST LISTED

Lysistrata, the title role, will be portrayed by Mrs. Kathleen Camp, a graduate student who has appeared with the Bowling Green players. The part of Lampito will be taken by Miss Pauline Wylie, who has been connected with the Huntington, W. Va., little theater; and that of Myrsine by Miss Hettie Knight, who has worked with the Lexington children's theater.

Probulos will be acted by Prof. Blaine Schick of the romance languages department. Professor Schick's last performance at Guignol was as the German consul in Clare Booth's "Margin for Error."

Raymond Rand, who appeared in Guignol's "Male Animal," will play the role of Kinesias. Curtis Owens, who has worked with the Yale school of drama, has been cast as Drakes.

Other members of the cast include Cleonice, Alma Rouse, Rhodope, Lois Brand; Ismenia, Elizabeth Edwards; Andromede, Rita Sue Leslie; Duce, Jean Wilson; Hermione, Eleanor Reed; Merope, Margaret Jane Jackson; Proome, George R

# Can't Blame Workers 100 Per Cent For Strikes In Defense Industries

SMOKE RINGS BY RICHARD P. ADAMS

In a democracy nowadays it seems that strikes impose certain problems that they do not cause in the dictatorships, and many also that they did not cause in democracies in the past. There has been some loose talk recently about "striking" strikes in defense industries, and there has been some action in one or two cases by the army.

While I am not in a position to know very much about labor problems, especially in the briefly on the defense strike angle. Anyone who knows of facts that tend to disprove what I believe to be true or probably true will bring such facts to my attention in the columns of this paper. I hope.

Let us look at the case that has caused most opposition to organized labor and the right to strike recently: the dispute at the North American Aviation plant in Southern California. The strike was called ostensibly for higher wages and a better bargaining position. The management refused to grant the strikers' demands, and the strikers refused to go back to work until the demands were granted. It seems to have been a perfectly normal strike in every respect but one: the plant affected was engaged in turning out aircraft for defense.

The public demanded, therefore, that the workers go back to work while the dispute was being negotiated. The workers refused, and the army broke the strike with troops. I am inclined to doubt the wisdom of such action, and I would like to inquire into the circumstances.

We need to know, first, whether the strike was justified, under ordinary conditions. Then we need to know why the workers refused to go back to work in this case, where it was so important to the public that they should.

Actually, the wages and working conditions of the men in the plant were below the standard in most automobile factories for similar work. It would seem, therefore, that the wage demand was probably a reasonable one, and that, if the company refused to grant it, the men had a right, under the labor policy of the present administration, to force their demand by stopping production at the plant. This they did.

The usual mediation machinery then went into action, but without tangible result. If we admit that the demands of the workers were essentially just and fair, as I believe they were, then the large share of the blame for the failure of negotiations must lie with the officials of the company who refused to grant them.

But this is still not the point of the controversy. The greatest cause has fallen on the workers for their refusal to go back to work while the dispute was being mediated. They have been accused of being Communists and of calling the strike not to get higher wages but deliberately to cripple the defense of this country against the Hitler-Stalin combination. (The present Russo-German war is a comment on the accuracy of that analysis). I suppose that Communists were active in that strike, as they are in most. But it is hard to believe that all, or even a majority, of the strikers who refused to return to work were Communists. They must have had some other reason.

There is one, and a good one. All you need to do to find it is to put yourself in the place of a striking worker. You believe that your cause is just and worth fighting for, and you are not going to do anything that might ruin it. You have succeeded, in cooperation with your fellow-workers in stopping production at the plant, and you figure that you can keep it tied up long enough to make it worthwhile to the man-

agement to give you your wage increase. It looks as though you are in a fair way to win your case, when somebody from the government comes along and asks you to go back to work while he adjusts the dispute.

Remember that you have put yourself in the worker's place. What would your answer be? You know that your only real weapon against the management is work stoppage. If you give it up, you have no way to put pressure on the company. Before you did, you would probably want to know what was going to take its place. Suppose you found there was nothing to take its place, and that as far as anybody could tell you, negotiations might go on for years while you worked on at the same old wage. The chances are that if you were a staunch, democratic American you would tell the man that you were doing all right without the kind of help he was offering. So far as I have been able to learn from sketchy newspaper accounts, that was essentially the offer the government made the North American workers; and we know that that was the answer the workers gave.

The broad outline of a solution is suggested by the problem itself. We do not want to deprive workers of their right to bargain for better wages and working conditions. At the same time, we want them not to stop production of armaments while the bargaining goes on. That means that there must be some substitute offered for the work stoppage which is the workers' only means of putting pressure behind their requests.

It is not necessary that we confiscate plants, or that we use the army to break strikes. It seems obvious to me that it is necessary only that we give mediation agencies the power to compel both employers and employees to abide by decisions arrived at after thorough investigation by trained men.

If workers could be assured that their employers would have to accept a fair decision of a dispute, I do not think there would be any difficulty about getting them to stay on the job pending that decision. If they are not given that assurance in some way, we will be faced by the same problem every time employees in a defense factory become dissatisfied. We cannot afford either the loss of production or the dissatisfaction among workers that present policies seem unavoidably to bring about.

## Defense At Home

We need not go across the sea to defend our right to our freedom. We need to fight here at home . . . fight to keep down Nazism, Communism and the many other isms that are working night and day to destroy the very things which to every citizen is one possession that is prized above all. —The Grapuchat, Radford (Va.) Teachers College

## Backhand Patriotism

There are those who argue that displaying the flag in a classroom is good for the youngsters. They argue that viewing the glowing red, the vivid blue, and the purest white, and singing the "Star Spangled Banner" loudly and lustily will imbue the impressionable youngster with all the essentials of love of country—then the child can go home and watch Daddy hedge on his income tax. —The Vidette, Illinois State Normal School.

## ON THE COLLEGE FRONT: Universities In The News

### PEANUTS PAY FOR EDUCATION

COMMERCE, Texas — Sales from a popcorn and peanut machine have enabled one youth to complete his education at East Texas State Teachers' College and are now paying for a second college education.

Purchasing the machine four years ago, Vernon Farrow of Gilmer operated the goober stand during afternoons and evenings. On graduation last spring, he turned the entire business over to his brother, Jack, a freshman, who is now operating the business to pay for his education.

### RELATED ARTS IN NEW CLASS

Three professors at Cornell college have combined three classes into one and are conducting a new course in related arts, covering the fields of art, literature and music. The idea came when the three were asked to lecture in their fields to an education class two years ago.

In the classes, if the students are examining modern America, for instance, they may read Paul Engle's "Break the Heart's Anger," listen to "Ballad for Americans" by John Latouche and "Hollywood," keeping them all in mind, watching for similarities and dissimilarities in the same trend.

### Prof To Teach Rural School

When the school bell rings after Labor Day for Weld County, Colorado, schools, at least one, the Hazelton district, will have a bona-fide professor presiding over the educational destinies of the pupils.

William H. Hargrove, professor of rural education emeritus at Colorado State College of Education, will return to his first love, the rural school.

Professor Hargrove said as an explanation for his interesting decision, that he wishes to prove the

### To Adolf, With Best Wishes

By Bill Mosier Jr., Tulane University

O, European sourpuss,  
O, drizzle of a man  
Come lay your gloomy cares aside  
And be a capper Dan.

O, Adolf Caesar Hitler, sir,  
O, grimace and mustache,  
Pray, leave your worried reasoning  
And taste of balderdash.

O, furrowed brow and starving look,  
Put on the magic shoes;  
The ocean then just step across  
To chase your Weary Blues.

Sieg heil, Adolf, how do you do?  
You got here mighty fast,  
So you'll come to our costume ball  
Dressed as Lenahut Notlast.

Now Adolf, this rotunda here  
Is Miss Maxwell by name;  
All parties here are Elsa's job  
(She's really quite a dame).

"Hello, Adolf, old kid, old sock,  
A drink is what you lack  
Oh, my! Do you always fall down  
When slapped upon the back?"

Adolf, come to! There, that's the boy,  
And chugging this Scotch;  
Now soon this cold, clear world will be  
A blooming merry blotch!

Ah now writhes near the Conga chain,  
Click to the left and right.  
Why, Adolf, you're goosestepping it,  
Such dignity's a sight.

O, Lord! Adolf, to take my word  
So hard with gray my hairs!  
I did not say to aim your toe  
At peoples' derrieres!

And now, may I present, Adolf  
Our own dear Eleanor,  
Our ravishing, first lady she,  
And THIS is Miss LaMarr!

Adolf, come come, you're making love  
To Eleanor, you lunk,  
Which leaves but one conclusion:  
You are getting awful drunk.

O, Aryan potentate gay,  
O, highest Mucky Poo,  
This is the night of which you've dreamed:  
To sing, to drink, to woo.

Liquor you down in mighty gulps,  
You've lost your puss like a pickle,  
You hell the waiters, and the girls  
With your mustache you tickle.

So, chief you howl till morning comes  
And daylight it does seep;  
And to your land then stagger back  
For lovely drunken sleep.

O, when you wake in Germany,  
You will be wroth, I fear,  
But come on back and we will help  
You weep into your beer.

The Luftaffe has flown away,  
Storm troops are out on spree,  
The governmental form there now  
Is pure democracy.

O, European sourpuss,  
O, fizzle of a man,  
We had you wired for sound last night  
Direct to Fatherland.

### THREE PROFS ONE CLASS

Something new in the way of study has been devised by the department of economics for the summer session at the University.

The daily period of study, generally allotted to lecture only is divided into two parts: the first half-hour is given to lecture the latter to general discussion by both students and professors.

The duties of the course are undertaken simultaneously by three professors who alternate in conducting lecture.

### SELLING USED CARS STUDIED

COLUMBUS, Ohio—How to dispose of last year's automobile will become an increasingly important question when national defense limits new car production a marketing expert predicts.

Dr. Theodore H. Smith, professor of marketing at Penn College, Cleveland, Ohio, has written the first book dealing exclusively with used car marketing.

"Marketing of Used Cars" was published by the Bureau of Business Research at Ohio State University and traces the 40-year history of used car selling.

### Baby Brings Schedule Mixup

It took some arranging but the Rev. and Mrs. Clifford Potts have worked out a daily living schedule to take into consideration their year and a half old daughter and their classes at Baylor university, Waco, Texas.

They arranged their class schedules so one could be with the baby at all times but it happened that each took alternate hours so the baby-to-class and class-to-baby rush now comes every hour from 8 a. m. to 2:40 p. m.

And, as bad luck would have it, they found there was no house available near the campus to permit them time for the baby-to-class and class-to-baby splits.

So they worked it out like this: Mr. Potts goes to his eight o'clock class, leaving Mrs. Potts with the baby. At 8:55 he hurries toward home. On the way he meets his wife carrying the child in her arms. She hands him the baby and hurries

on to school. He takes the little girl home again.

The exchange occurs from father to mother at 10 a. m. from mother to father at 11:40 a. m. and so on throughout the day.

Of course, the baby gets plenty of airing and when one or the other father pants is a little late she changes hand with the mother and father almost on the run.

### GLAND MYSTERY UNSOLVED

BERKELEY, Calif. — The mysterious thymus gland was even more of a mystery than before to science today, after experiments at the University of California indicated that the gland had nothing to do with body growth and development of sexual organs, as had been supposed. Experiments on rats whose thymus glands were removed, showed that their growth and development were not affected by the operation.

## Shop Talk

### Fair and Cooler

Cool cottons for campus and casual wear. You can't have enough of these live-wire fashions. Choose a crisp white blouse or a smooth chambray to see you through the hot summer days ahead. MEYER BROTHERS has them.

### Time Piece

Know your time and know it's right with a watch from EDWIN BOGAERT (next to the Kentucky Horse). The newest designs, latest mechanical perfection, plus the assurance of nationally known names make your watch one you will appreciate and enjoy for a long time to come.

### Good Eatin'

For that late-summer spread, get the Shims at J. D. POSTER MEAT MARKET (150 South Lime). You'll find they have everything from real country ham to dull pickles.

### Musical Preview

Stop at BARNETT MILLERS, listen to these, then look for them on your future Hit Parade. — "The Memory of a Rose" and "Pierced Lullaby" recorded by Glenn Miller. — "I Understand" backed up by "For Want of a Star" and "Bing Crosby's latest, 'You and I' teamed with 'Brahms' Lullaby'."

### Travel Togs

Plenty of practical one in the two-piece seersucker suits featured by the DARLING SHOP. They come striped or checked in a rainbow of colors. Priced to please your budget at \$29.99 and \$39.99.

### A Sense of Values

When play shoes which were proven hits at \$8.95 go on sale during mid-summer at \$3.95, a word to the wise suffices. BAYNARD is the place to see and buy these outstanding values. We suggest going early while the size last.

### Heading Home

Arrive at your destination looking your best by getting a shampoo and finger wave at the SOUTH EERN GIRL before leaving. Remember that impression counts after a five-week absence.

### Pennywise

Don't miss the MAY FAIR SHOP'S grand clearance of all summer dresses. From their reductions, and replenish your wardrobe now while there's still lots of summer weather left.

### Light and Fluffy

They're wonderful! You'll agree with us when you try the large, fluffy yeast doughnuts at YOUNG'S BAKERY. Perfect for bulk-ordering. You get five for a dime.

### Suit Yourself

If you're the feminine type and your room is fully in fashion, get a pretty all-glass frame for your prized photos. If you're the laid-back, efficient type, get some genuine leather slippers instead. LAFAYETTE STUDIO has a wide selection in both styles.

### Book Brigade

If you read at all, you'll be interested in the book about being held by the CAMPUS BOOK STORE. There's a real one on this when you consider that it's a 200-page volume.

## David Morton Shows Mastery Of Sonnet Form In New Book

ANGLE OF EARTH AND SKY. By David Morton. The Macmillan Company, \$1.75.

Lovers of poetry who have not acquainted themselves with the work of David Morton have missed the expressions of a quiet but genuine talent. In his modest verse are music and imagery and unpretentious philosophy and a fine gift for phrase.

It is in that rigid form of verse, the sonnet, that he is best known. In his severe discipline, somehow, he has been easily at home, and among the knowing, as a consequence, he is recognized as a master of it.

Though in his latest book, "Angle of Earth and Sky," he does not restrict himself to the sonnet, it seems to me that in it he is still at his best. The other poems, to be sure, are marked by his characteristic delicate lucidity, but, to me, they simply aren't so effective. That impression may arise from his own greater skill with the sonnet or from my preference for the form.

### Carlisle Named Kavanaugh Coach

Ralph Carlisle, for three years basketball coach at Madison High, Richmond, was appointed by the Anderson County Board of Education to fill the vacancy at the Kavanaugh High School, as teacher and coach caused by the resignation of Dave Lawrence, who has accepted a position as principal and coach of the Carrollton High School.

Carlisle is a graduate of the Kavanaugh High and University of Kentucky, Lexington. He made quite a record in high school and college as a basketball player.

**No Need To Dress Like A Tramp When Traveling On Train Today**

By TONI

Many of you will be leaving the campus soon to return to your respective homes and routine of living. Whether you travel by auto, train, or bus, don't make the mistake of wearing your oldest outfit and arriving there looking slightly on the dowdy side.

Means of traveling have been so revolutionized during the past few years that you need no longer fear the smoke and soot that accompanied yesterday's travels and lodged insistently in your clothes which warranted the wearing of an outfit you "didn't care about."

Today, travel is an occasion or a state of affairs to be dressed to. Today's traveling lady is judged by the appropriateness and attractiveness of her luggage and outfit.

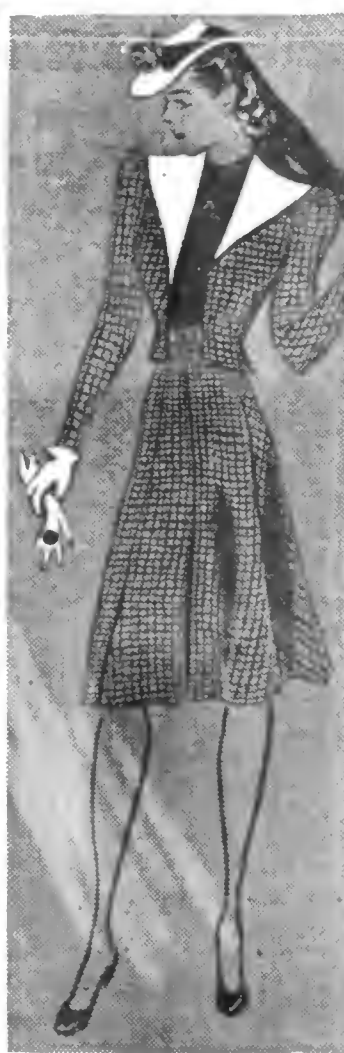

**INVEST IN LUGGAGE**

If you travel a good deal, then do invest in some really good-looking luggage. Get the very best you can afford. The wear and pleasure good luggage will afford will be well worth the price you pay.

Perfect traveling companions for summer wear are the cool, washable suits so popular this year. They're easy to wear and are made from a variety of cotton, rayon and linen fabrics.

Seersucker leads the field in cotton because of its crushproof qualities. One striped two-piece is made on long, easy-going lines with large white discs buttoning the short-sleeved jacket. If you're tall and slim, you might try a cheerful Glen plaid that boasts a casual long-torso jacket and kick-pleated skirt.

Gingham, also big fashion news this year, has been used effectively in a cool, casual model accented with white pique. For those who like pique, there's a honey in red and white that's striped like a peppermint stick. Simply tailored, it is collarless with four patch pockets to add interest to the hip-length jacket.

TRAVEL SUIT

Be smart and cool while traveling with this checked gingham suit that has snowdrift lapels of white pique.

Spun rayon has done itself proud in two strikingly different suits. One is yellow with a drawstring peplum jacket over a white spun rayon blouse, gracefully deep-throated with a winged collar that is worn over jacket. The other is rayon crash in beige and white herring-bone. It's fitted, white-trimmed top and easily flared skirt frankly compliment a tiny waist.

The not-so-slim will appreciate the darker suits whose primary purpose is to deceive the public. Navy blue and white spun rayon, printed with a small, neat design, highlights the face with a crisp white collar that is square and ample.

Rayon shantung is featured in a suit-dress designed to win admiring glances. The cool beige dress is topped with a contrasting dressmaker jacket.

Crush-resistant linen makes its bid for traveling in dark colors. One favorite is navy blue frosted with eyelet touches that give the appearance of being as fresh as the proverbial daisy. Another eye-catcher is of dark, foresty green rayon linen with collar and cuffs in the bright orange-red of early turning leaves. Still another is of the new Skylark brown teamed with a Skylark grey blouse.

Add to your selection a non-skid hat that will stay with you without yielding to the breezes and going askew impulsively; a roomy hand-bag that will carry all your traveling needs without bulging; washable gloves; and comfortable shoes. Then, be sure you have your ticket and enough reading material, if you're not going by car, and you're set for a perfect take-off and a bon voyage.

**Armstrong Speaks**

Mr. Watson Armstrong, instructor in agricultural education, will address an agricultural teacher conference on "Organizing Systematic Courses of Instruction" at Iowa State college today.

**Phys Ed Club, B And G Teams Meet In Finals**

BULLETIN

In the first round of the softball league playoffs last night, the Physical Education club took a narrow 4 to 3 decision from the Frat Boys, with Martin scoring the winning run with a sizzling homer. The Buildings and Grounds team took the second game 1 to 0 on forfeit from the Fillies. The P.E.'s B and G teams will meet in the finals Tuesday night on the stall field diamond.

As finals was written to the regular season schedule of the softball league last Thursday, three of the four teams on the league roster were deadlocked for first place.

The Phys Ed Buildings and Grounds, and Frat Boys teams were all bunched at the top of the standings with records of four wins and two defeats. The Fillies completed their schedule with six losses and not even a score in the win column.

Scheduled for 4:45 this afternoon on Stall field the league championship will be decided in a contest matching the winners of the final

playoffs yesterday when the Buildings and Grounds team met the Fillies, and the Phys Ed aggregation battled with the Frat boys.

Winners of their last two contests the Phys Ed boys and the Buildings and Grounds teams handed the other league members a double trouncing on July 8 and 10. The Phys Ed team outscored the Frat Boys 9 to 4, and the Fillies 14 to 9, while the Buildings and Grounds group repeated the winning performance by beating the Fillies 14 to 1 and the Frat Boys by a score of 6 to 5.

In makeup games on July 7 and

9 the Phys Ed team won over the Buildings and Grounds 9 to 6 and the Frat Boys won another at the expense of the Fillies 2 to 1.

Of 4,500 students at the University of Kansas, Methodists lead with an enrollment of 1,432.

**Radio Buys Flash SOS In Submarine Rescue Method**

SAN DIEGO—A new submarine rescue method employing radio buoys which automatically flash SOS signals and a new type of steel diving chamber has been devised at Fort Rosecrans by Master Sgt. Frank Newton, army ordnance expert and inventor.

Newton displayed a design for a steel diving chamber, 30 inches wide and eight feet long, containing 20 cubic feet of pure oxygen compressed at 2,000 pounds pressure, and lime in a separate perforated container to absorb exhaled carbon dioxide.

**IMPORTANT**

He said such a chamber is an improvement on the present diving bell because its two occupants could regulate oxygen pressure by valves to maintain surface atmospheric pressure at all times, thus enabling rapid ascent.

The present diving bell, he said, receives compressed air, not oxygen, through pipes from the rescue ship, and must ascend slowly through several decompressor stages, after which those brought to the surface must enter a decompression chamber.

**RADIO BUOYS**

The radio buoys, one forward and one aft, would be installed in the upper side of submarines under swinging hinged doors, Newton explained. When a submarine descended to a pressure beyond safe limits, locking keys on the hatches would be released automatically, causing the buoys to go to the surface, each on a quarter-inch steel cable, unwinding to as much as 500 feet.

When the buoys broke to the surface, an oscillating radio device built into them would, with the pitching of the tide, send out SOS signals.

On arrival of a rescue ship, the oxygen cylinder would be guided to

the rescue hatch by loops attached to the cable leading from the radio buoy. Compartments holding the buoys in the submarine would have double hatches, the upper cover being released automatically to allow the buoy to escape and the lower hatch operated from inside to allow the crew access into the rescue chamber, Newton explained.

**BUSINESS SHOWS MAY INCREASE IN KENTUCKY**

University's  
Research Body  
Announces Rise

Kentucky business in May was 17.2 per cent above May, 1940, and, spurred by the resumption of coal mining in eastern Kentucky, 21.4 per cent better than April, 1941, the University of Kentucky Bureau of Business Research today reported. Excluding the enormous increase in coal production, May business was 25 per cent above the April, 1941, level.

Each of the bureau's 10 indexes showed an increase over May, 1940, and all but life insurance sales and postal receipts were above those of April, 1941.

May business conditions by areas, as computed by the bureau:

Louisville—Up 29.4 percent from May, 1940, and 8 per cent over April. Declaring "a number of apparently permanent factors underlie" the Louisville boom, the report said this was reflected by announcements of proposed construction of two industrial concerns whose products have peace-time as well as defense uses.

Central Bluegrass—Up 6.1 per cent from May, 1940, and down 3 per cent from April, which was termed "not significant considering the changing date of Easter." Retail trade and electric current consumption were up 9.4 and 9.5 per cent, respectively, over May, 1940.

Covington-Newport—Up 11.5 per cent from May, 1940, and up 2.9 per cent from April, 1941, with continued advances in retailing and bank checks handled as "evidence of increasingly prosperous conditions."

Paducah—"A phenomenal rise in business" credited to activity by local railroad shops, local construction and highway work, strawberry seasonal activity and nearby TVA construction. May retail trade was up 34 per cent above May, 1940.
